

Alpine M1 & M1-Passive

Passive and active AM1 CPU Cooler

Quiet Power!

The Alpine M1 & Alpine M1-Passive replace the noisy stock cooler

Building a quiet PC system with a low budget? Yes it is possible! The Alpine M1 & Alpine M1-Passive were specifically designed for the AMD AM1 platform and are the ideal alternative to the noisy stock cooler.

The cooling performance of the whisper quiet Alpine M1 is more than sufficient to keep every AM1 CPU at bay by margin. An 80 mm low speed fan delivers the desired airflow and pressure without producing any audible noise. Even under full load it generates only 0.1 Sone which makes it twice as quiet as the stock cooler.

Even less noise is only possible with the Alpine M1-Passive. The passive CPU cooler is completely maintenance free and does not collect dust, offering an affordable solution to make a PC absolutely silent.

QUICK FACTS Alpine M1 Whisper Quiet AM1 CPU Cooler

- Whisper quiet
- Cooling performance with margin
- Long Service Life
- Pre-applied MX-2 thermal compound

QUICK FACTS Alpine M1-Passive Silent AM1 CPU Cooler

- High passive cooling performance
- Allows completely fan-less systems
- Pre-applied MX-2 thermal compound

About ARCTIC

As an international company ARCTIC is one of the leading manufacturers of computer cooling and has a profound know-how in the field of consumer electronics. With headquarters in Switzerland and offices in Hong Kong, Germany and the U.S., we sell our products in over 45 countries around the world.
