

Less Noise, More Sound

## Freezer 32 series

Semi Passive CPU Cooler with 120 mm Fan

### The Price-Performance Champ for Enthusiasts

The Freezer i32/A32 is the first semi passive ARCTIC cooler

The smaller and lighter successor of the Freezer i30/A30 is the perfect gadget for PC enthusiasts looking for an ultra-quiet but efficient solution for the CPU cooling. It is the first ARCTIC cooler which comes with the new fan controller developed in Germany.

ARCTIC cooler are well-known for optimum cooling performance at a low noise level. By semi passive performance the Freezer i32/A32 provides again a special feature. A sophisticated fan controller enables that the CPU is completely passively cooled during typical Windows operation. The F12 PWM fan only start up at a higher temperature (from 40% PWM).

#### German Fan Controller Lowers Noise

This does not just make the computer quieter most of the time, but increases the service life at the same time. In active mode the improved bearing with a new alloy/lubricant combination cares for minimum noise levels at longer service life. Moreover, the lower footprint of the Freezer i32/A32 allows a problem-free installation and avoids interference with the RAM, even if there are two fans used. Due to the screw-mount onto a back-plate and a significantly lower weight compared to the i30, the cooler is, not least, absolutely safe also on the go.

And for everyone who prefer to run their computer 24 hours a day, 7 days a week ARCTIC has the Freezer i32 CO in the "continuous operation" edition with a specially for continuous operation optimized dual ball bearing.

#### QUICK FACTS Freezer i32 / A32 Semi passive CPU Cooler with 120 mm fan for Intel and AMD

- Improved cooling performance
- German fan controller
- Improved Bearing
- Optimal compatibility through lower footprint
- Transport safe due to a back-plate and a lower weight
- MX-4 thermal compound included

**Freezer i32 CO** CO version with dual ball bearing for continuous operation 24/7 without the slightest compromise in performance

#### About ARCTIC

As an international company ARCTIC is one of the leading manufacturers of computer cooling and has a profound know-how in the field of consumer electronics. With headquarters in Switzerland and offices in Hong Kong, Germany and the U.S., we sell our products in over 45 countries around the world.
