

Less Noise, More Sound

## F Silent series

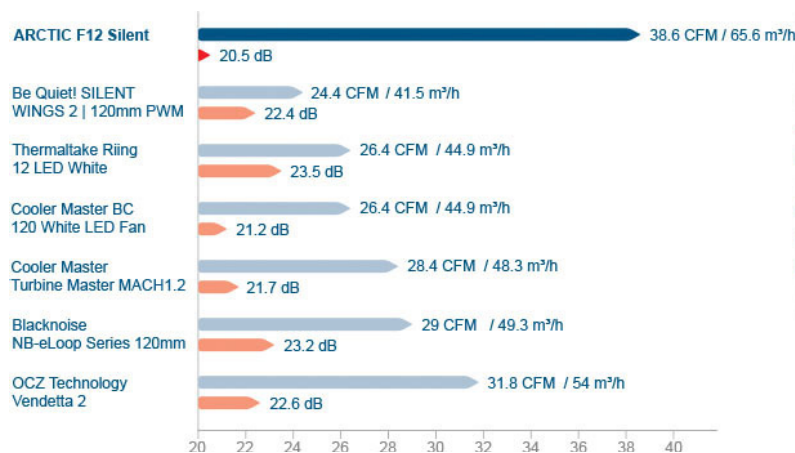

3-Pin fan with standard case

More Airflow,  
less Noise

With the F Silent Series comes the next generation of almost silent ARCTIC fans

In its class the F Silent offers the largest airflow by margin and yet is quieter than any other fan in the roundup – the top choice for silent fans. There is no need to compromise case ventilation, even if noise is not an option.

The secret to this success? An innovative design done through computational fluidic dynamics with a motor developed in Germany. At low fan speed, the motor and bearing noise is key. A new alloy/lubricant combination reduces friction, which not only lead to increased service life but most of all keeps the operating noise to a minimum.

That's the perfect balance of quietness and performance!

### QUICK FACTS F8/F9/F12 Silent Ultra Quiet Case Fan

- Virtually Silent
- Highest Airflow in its Class
- New alloy/lubricant combination reduces friction
- Fluid dynamic bearing extends service life

### About ARCTIC

As an international company ARCTIC is one of the leading manufacturers of computer cooling and has a profound know-how in the field of consumer electronics. With headquarters in Switzerland and offices in Hong Kong, Germany and the U.S., we sell our products in over 45 countries around the world.
